● One Loring 24" Pack Basket Price Per: \$199.99 Tax Not Included Lorin

TOTAL (tax & shipping fees not included): \$963.08

The following budget proposal includes all tools required for the Conservation Law Club to go ice fishing this winter. These tools will allow members to gain hands-on experiences with winter fishing conditions during club outings or individually through the club inventory, which we plan to make accessible to all members through a controlled library-like system.

It is important for students in the conservation law program to understand Maine's recreational activities, especially if students plan on becoming game wardens and enforcing laws pertaining to recreational activities. Ice fishing is a very popular practice during Maine winters, gaining firsthand experience is crucial in helping club members develop safe and effective fishing techniques on ice, an understanding of laws & regulations, and a better understanding of local ecosystems and fish behavior during colder months.
